BEING DEVELOPED FOR 2023-24 SCHOOL YEAR

HEALTH CAREERS - SURGICAL TECH

Careerline *Tech Center*

Course Description:

This is an intro course offers training in surgical technology, as well as basic healthcare principles. Surgical technologists are medical professionals who specialize in preparing the operating room and assisting surgeons during surgeries.

- Students will learn how to provide quality care by learning sterile and aseptic techniques as well as best practices in the operating room.

- Surgical technologists can be found in different areas of healthcare facilities such as labor and delivery, operating rooms, cardiac catheterization, outpatient surgery, and more.

- Students will learn surgical instrumentation, a variety of surgical procedures, and human anatomy.

- Students will learn operating room safety procedures, communications, infection control, legal/ethical principles, health care systems, teamwork, medical terminology as it applies to the surgical field, CPR and First Aid, employability skills, and surgical principles.
