

Late Winter Screen-Up Data Protocol

Objective: To provide Tier 1 intervention support for students during the rest of the winter and spring.

1. Click **Standard Summary** for the winter assessment used to screen up.
2. Click **Generate Report** to display the percent of all students who performed below benchmark for each readiness standard.
3. Sort each readiness standard into two categories.

Low Priority/High Performing Readiness Standards	High Priority/Low Performing Readiness Standards

4. Analyze each **low priority/high performing** readiness standard.
 - Celebrate high performance with staff and students!
 - What mathematical supports may have contributed to the positive results?
5. Reflect and plan for each **high priority/low performing** readiness standard.
 - What additional support will be provided this winter or spring to increase student readiness to learn?
 - What additional support will be provided next year during tier 1 instruction to increase the number of students meeting benchmark?
