1.	**6**
2.	**8**
3.	**1**

4.	$(x + 3)$ and $(x + 2)$
5.	$(x + 4)$ and $(x - 2)$
6.	**-3** and **-5**

|	
7.	**-4**
8.	**3**
9.	**19**

|	
10.	**linear** because the values of x and $g(x)$ **always** change at a constant rate
11.	**non-linear** because the values of x and $f(x)$ **do not always** change at a constant rate
12.	$f(x) = x^2 + 5$ and $h(x) = 2^x + 5$

13.	14.	15.
